## PROFESSIONAL EXPERIENCE

### Information Technology | July 2025 - November 2025

Rebus - Technology Solutions

- Contributed to the development of the company's core software, working closely with the engineering team to improve functionality and overall user experience.
- Designed and built responsive websites, transforming concepts into visually appealing and user-friendly interfaces using Figma.
- Created interactive mobile application prototypes to support design validation, usability testing, and iterative product improvement.

### Information Technology | September 2022 - January 2024

New York University Abu Dhabi

- Provided technical assistance to faculty, staff, and students across various departments.
- Prepared and configured laptops for new users, including system setup and deployment.
- Reimaged devices and performed troubleshooting for hardware and software issues.

## EDUCATION

### British University College | 2023 - 2025

Bachelor of Science in Business Management

- Gained foundational knowledge in business operations, management principles, and organizational strategy.
- Developed practical skills in leadership, decision-making, project management, and problem-solving.
- Completed coursework and projects involving marketing, finance, human resources, and business analytics.
